

Theatre 336 – 3D Location Recording

Create 4 recordings of a location that has interesting and distinctive ambient sound. The recordings will be in different spatial locations to help create a three-dimensional soundscape.

Instructions:

Pick a location to record. Outside is better. Inside should be a large space. Not on campus.

Using the Voice Memo or Sound Recorder app (or a suitable 3rd party recording app) on your smart phone, make 4 different recordings in 4 different places at your location.

Recordings should be at least 2 min 30 sec EACH.

Beware of handling noise on your phone. HOLD STILL.

Be aware of the mic location on your phone. Point the mic at what you are recording.

Listen to each recording in headphones or earbuds and make sure it is clean.

(If the recording is not clear, rerecord at that location...)

Email your files to yourself or download them from your phone to your computer.

Title all 4 files with your name and the location and the number of the recording (“Phil_JezeroCrater_01”).

Turn each of the files in to your 336 Google Drive folder.

Due March 3.
